

Description

Arcadis seeks a Client Program Manager to join our team in Birmingham, Alabama on a major drinking water system improvement program over a multi-year period for the largest drinking water system in the State. The qualified candidate would be an expert in the client's needs around capital program prioritization, planning and delivery, with technical knowledge of water treatment plant, distribution system and pump station design and construction services.

Essential Job Function(s):

- Leading the execution of program strategy, tactics, and procedures, and leveraging knowledge of infrastructure programs related to planning, inspections, condition assessment, rehabilitation, operations, design, and construction.
- Leading the Arcadis Team to address client directives and implement solutions resulting in effective oversight and coordination of capital planning.
- Providing decision-making regarding project authorization; leveraging strong client listening skills; overall program management skills with the ability to clearly define problems, objectives, and scope; sound cost and schedule estimating experience; and the ability to organize and direct internal staff and external subcontractors in accordance with project priorities, guidelines, and contractual obligations.
- Managing program resources and making project assignments based on a comprehensive understanding of all work requested by client as well as the skills and capabilities of Arcadis staff.
- Leading program controls and audits utilizing familiarity with Primavera and/or Microsoft Project as a CIP scheduling tool is desired, or the skills to learn it in time.

Key Attributes:

- Program leadership and experience on infrastructure projects of various sizes.
- Demonstrated ability to think strategically and analytically about technical challenges.
- Experience preparing, reviewing, and approving design reports, project drawings, specifications, schedules, and cost estimates.
- Client relationship skills; including preparation and development of proposals and managing client expectations, developing and leading presentations, with a successful track record of delivering various engineering projects to the expectations of the client.
- Active participation in regional and/or national professional associations.

Qualifications

Required Qualifications:

- 10 + years of experience working with clients to develop and successfully implement programs and manage the delivery of capital projects.
- Demonstrated ability to successfully collaborate with diverse stakeholders including historically underutilized businesses.
- BS Degree in Civil, Environmental, or related engineering field.
- Active experience in infrastructure engineering.
- Licensed Professional Engineer in Alabama or ability to obtain AL licensure within six months of hire.

Preferred Experience, Skills and Abilities:

- 12+ years of experience in infrastructure program management, engineering and consulting, primarily related to the municipal market.
- Master of Science or Master of Engineering in related field.
- Certified Program Management Professional (PgMP).
- Collaborative project delivery experience (DB, CMAR, etc.)

Why Choose Arcadis?

Arcadis is the leading global design and consulting firm for natural and built assets, and we invite you to join us in partnering with our clients to deliver truly exceptional and sustainable outcomes. Contribute to the world's most high-profile and transformative projects, from shopping centers in Shanghai and improved traffic flow in Atlanta to state-of-the-art rail systems in Doha, coastal defenses for Manhattan and cleaner air in Los Angeles. Work alongside the industry's foremost thought leaders and accomplished professionals, generating effective, real-world results. We are Arcadis: 27,000 people in more than 70 countries, creating value by applying our collective wisdom to every challenge. Our culture is collaborative, we believe in diversity and the power of global teamwork, and we own the responsibility to sustain the Earth and its people in a safe and balanced way. Arcadis. Improving quality of life.

Water is the world's most critical resource. At Arcadis, we work tirelessly to help protect this natural resource, focusing on the entire water cycle. From source to tap, managing rivers and coast zones, urban and rural water supply, and issues related to climate change and rising sea levels, our specialists, engineers and scientists help address all of the challenges facing water. Using cutting-edge technologies, collaborating to develop innovative solutions and tapping into global learning development resources, we are uniquely positioned to provide safe and secure water services that support the demand of a rapidly changing world. Join our team to start improving quality of life today.
