

Arcadis is seeking a **Senior Water Project Manager** with 6 to 10 years' design and project management experience to join our Water Business Line Team in Birmingham, Alabama.

This is an exciting opportunity for a self-motivated engineer to join our team locally with support from one of the best-qualified consulting firms in the country. The Project Manager will utilize their expertise and technical knowledge of water treatment and distribution, to manage infrastructure design and construction projects teams. At Arcadis, our vision of improving quality of life has become our passion and it is through our passion, our people and the work we do with our clients that we are shaping the future of our world, every day.

Although specific technical expertise is valuable, the ability for the successful candidate to manage both schedule and quality of multi-disciplinary inter-organizational teams is even more critical for this role. Fundamental to the role is the ability to be an effective communicator and work collaboratively with clients, consultants and contractors.

#### **Essential Job Function(s):**

- Manage projects and clients' expectations from planning to design review and construction of water treatment and distribution infrastructure, as well as reviewing construction documents/specifications and supporting engineering services during construction.
- Meets established quality, budgets and delivery schedules for each assignment.
- Lead the planning, management, execution, and delivery of engineering projects.
- Serve as Project Manager for projects of different levels of complexity and size.
- Supervise and support the work of others.
- Mentor and coach junior staff to enhance the project team's overall capabilities.
- Develop scopes of work and budgets.
- Develop relationships and/or provide guidance on teaming partners for pursuits.
- Other duties as assigned.

#### **Key Attributes:**

- Ability to foster and thrive in a collaborative and diverse work environment.
- Demonstrate ability to manage multiple, unique projects simultaneously.
- Displays strong organizational, analytical, and problem-solving skills.
- Self-motivated, team-oriented, and flexible. Must possess the initiative and ability to tackle new projects and challenges daily.
- Strong, clear, and concise written and oral communication skills.
- Experience with Microsoft Office Suite, as well as MS Project and/or Primavera scheduling software.

- Active participation in regional and/or national professional associations.

## **Qualifications**

### **Required Qualifications**

- 6 + years of experience working with clients to manage and successfully deliver capital projects in the water/wastewater utility sector.
- Licensed Professional Engineer in Alabama or ability to obtain AL licensure within six months of hire.
- Experience preparing, reviewing, and approving project drawings, specifications, schedules, and cost estimates.

### **Preferred Qualifications**

- 8+ years' experience with water system planning, design, management, permitting and construction engineering activities with a similar Engineering Consulting firm.

### **Why Choose Arcadis?**

Arcadis is the leading global design and consulting firm for natural and built assets, and we invite you to join us in partnering with our clients to deliver truly exceptional and sustainable outcomes. Contribute to the world's most high-profile and transformative projects, from shopping centers in Shanghai and improved traffic flow in Atlanta to state-of-the-art rail systems in Doha, coastal defenses for Manhattan and cleaner air in Los Angeles. Work alongside the industry's foremost thought leaders and accomplished professionals, generating effective, real-world results. We are Arcadis: 27,000 people in more than 70 countries, creating value by applying our collective wisdom to every challenge. Our culture is collaborative, we believe in diversity and the power of global teamwork, and we own the responsibility to sustain the Earth and its people in a safe and balanced way. Arcadis. Improving quality of life.

Water is the world's most critical resource. At Arcadis, we work tirelessly to help protect this natural resource, focusing on the entire water cycle. From source to tap, managing rivers and coast zones, urban and rural water supply, and issues related to climate change and rising sea levels, our specialists, engineers and scientists help address all of the challenges facing water. Using cutting-edge technologies, collaborating to develop innovative solutions and tapping into global learning development resources, we are uniquely positioned to provide safe and secure water services that support the demand of a rapidly changing world. Join our team to start improving quality of life today.
